

Important Guidelines to Interpreting Unbrako Published Technical Documents.

Unbrako regularly publishes technical and sales information relating to products sold under the Unbrako and Durlok brand names. These publications range from detailed engineering and technical guides to sales price lists, sales flyers and advertisements.

These publications will refer to products and sizes that may or may not be considered manufactured to stock. Please consult an UNBRAKO distributor or UNBRAKO to determine availability.

Technical Standards

Unbrako technical and sales publications are guides designed to aid product selection, with reference to descriptive and technical data as well as technical discussions for application and use.

The use of precision fasteners in the worldwide market has led to the creation of many standards. These standards specify the fastener requirements: dimensions, material, strength levels, inspection etc. Different standards are the responsibility of various organisations and are not always identical. Unbrako supplies precision fasteners manufactured to Unbrako internal specifications, designed to achieve maximum interchangeability with all standards. Reference Consensus standards referred to in Unbrako publications were current at the time of publication. However, Reference Consensus standards are subject to change by any standards organisation at any time.

Technical data provided in these publications is for reference only and does not constitute certification that products supplied were manufactured to any specific values.

UNBRAKO products are manufactured in accordance with revisions valid at time of manufacture.

Unbrako reserves the right to update or modify its manufacturing specifications without prior notice.

A direct or indirect reference to a consensus standard to represent that a fastener conforms to particular requirements of the consensus standard shall not be construed as a representation that the fastener meets all the requirements of the consensus standard.

The technical discussions referenced in these publications represent typical applications only. The use of information provided is at the sole discretion of the reader. Because applications vary enormously, UNBRAKO does not warrant the scenarios described are appropriate for any specific application. The reader must consider all variables prior to using this information.

While we strive to meet all standards and values referred to in these publications, we only offer certification to the most appropriate consensus standard for any particular product.

Products modified other than by UNBRAKO are not guaranteed and not subject to return.
